MEDIA ALERT - BLT Launches Public Seminars

BLT LAUNCHES PUBLIC SEMINARS SERIES ON CONSCIOUS LEADERSHIP

First of unique Leadership Training series, offering three dimensions of leadership training

/24-7PressRelease/ - OAK PARK, IL, July 19, 2008 - To be an outstanding organization it takes courage and belief in its people. Develop the next generation of successes through our Conscious Leadership program. Conscious Leadership is the first of three programs in our Leadership Trilogy Series where we build leaders for positive global change.

The Conscious Leadership Series, developed by Business Leaders For Tomorrow (BLT), is the first of a trilogy of development dimensions which goes beyond standard management training; it is specifically designed to Expand, Align, and Deepen participants' level of Self-Awareness in personal growth and professional development. BLT does this by implementing profound tools and principles called Total Life Training Development (TLTD) . Our courses include:

- Conscious Essentials: This two day course is the first essential introduction to the principles of leadership, self-awareness, business skills, and work-life balance, which define a Conscious Leader and empower your organization with an empowering approach to management.
- Life-Changing: Building upon our Conscious Essentials, we challenge participants to enhance inner-confidence for one full day, and the second day to think creatively to solve daily situations and embrace the change necessary to become a Conscious Leader and foster an organization's growth.
- Empowering Leadership: An explosive approach to maintaining the life of a Conscious Leader, both personally and professionally, while creating an optimal legacy for your organization. This is the last course of the Conscious Leadership Series.
