Domain Investors announce purchase of real estate domains related to Florida travel, service, and real estate

Domain Investment Firm, InvestInURLs.com, captures geographic and keyword domains related to specific products and services in Florida cities

/24-7PressRelease/ - MIAMI, FL, July 23, 2008 - Domain Investment Firm, <http://www.InvestInURLs.com>, recently purchased over 50 domains, also known as URLs, that relate specifically to products, business services and travel in Florida. These recent acquisitions add to the company's growing number of Internet assets to monetize through domain parking, resell through their domain marketplace, or monetize them through domain development strategies.

"We are very excited to add these Florida domain names to our growing portfolio. This collection represents both geo domains and product/service domains and fits perfectly within our investing strategy of investing in keyword domains. We have not mapped out individual URLs yet, but some of the domains will be developed, a few we'll hold on to as long-term investments, and others will be available for sale in the domain aftermarket." says owner Jay Lohmann.

Florida is one of the world's most popular travel destinations with cities like Daytona, Miami, Ft. Lauderdale, Del Ray Beach, Boca Raton, Key Largo and Lake Okeechobee.

As the reality and importance of internet real estate development becomes more apparent, this portion of our domain portfolio will become more significant. Tangible Florida real estate is hot and in demand. The same is true for virtual real estate. Where there are dense populations of people, there is a lot of competition for Internet visibility. We feel these Florida URLs strengthen our position at the crest of Internet real estate investing and we look forward to the opportunities they provide.
