Great Plains Consultants and Integrators with emphasis in Technology - Alba Spectrum

Microsoft Dynamics GP functional and technical consulting requires strong backing in technology experience, background, training and certification.

/24-7PressRelease/ - NAPERVILLE, IL, July 24, 2008 - Microsoft Dynamics GP functional and technical consulting requires strong backing in technology experience, background, training and certification. Modern ERP consultant should be familiar (or be capable to involve fellow consultants) with industries, managerial and financial accounting, be reasonable good in reports design, system modification, have some knowledge and be aware about specific programming techniques and customization tools. We would like to introduce our company to you, GP user in your organization for advanced technology challenging projects: Dexterity customizations, Crystal Reporting (based on SQL Stored Procedures and Views), eConnect eCommerce programming, integrations (including EDI, GP Integration Manager, SQL Scripting and eConnect). Here is the introduction:

1. GP Software Licenses Sale. If you are in the beginning of your ERP and MRP selection, then we are happy to come through your business requirements, select Great Plains modules to be purchased and implemented and complete Sales phase
2. GP Implementation phase. Here you need legacy accounting data conversion and migration to Dynamics GP (often just beginning balances and master records, but sometimes complex historical data migration is required). Next step is user training and going into pilot phase, when you maintain two systems in parallel for one month: your legacy ERP and Great Plains, comparing financial statements to get comfort level in going to final switch to GP in production
3. GP Integration with legacy applications. Often we see EDI (or Electronic Document Interchange) requirement, especially if your organization participates in EDI ordering from large vendors and suppliers. In the case of Great Plains Integration tools are GP Integration Manager, eConnect, SQL scripting, Microsoft Dexterity
4. GP customization projects. Here you may already have GP implemented in the past and you need version upgrade for your Great Plains Dexterity custom module, where original GP Dex developer is no longer around. You can call us, we should be capable to recover and upgrade your custom module

About Alba Spectrum Group
