/24-7PressRelease/ - July 25, 2008 - Your Practice Online is a website designing and development company specializing in medical web designing. Your practice online services include health web development, online promotion and multimedia health education(<http://www.yourpracticeonline.com.au/multimedia.html>).

Your Practice Online has developed video on Anatomy of Spine which well explains on spine joint movements, parts of back bone including cervical, thoracic, lumbar and sacrum and common surgical procedures.

Your Practice Online provides medical 3D surgery on spine deformities including scoliosis, lordosis and kyphosis. Scoliosis is a condition where the spine or back bone is curved sideways instead of appearing in a straight line. The most common type of scoliosis is adolescent idiopathic scoliosis. Lordosis is a condition where the natural inward curve of the spine in the lumbar region is abnormally increased or pronounced and kyphosis is an abnormal curving of the spine usually occurring in the thoracic region.

Your Practice Online provides complete information on Kyphoplasty, spinal fusion and lumbar laminectomy including indications, surgical procedures, post operative care, risks and complications. Your Practice Online also develops 3D animation video on back pain treatment which briefly describes about acute and chronic pain, causes, surgical treatment and diagnosing back pain which can be easily understood by the viewers without difficulties.

Your practice online is a complete internet and multimedia solution for health professionals and organizations. Your practice online can enable your presentations in power point, flash and 3D studio max. The information in their video presentation has been intended to help viewers to understand the structure and function of spine anatomical components.
