**Stellar Introduces New Updates for iPod Recovery**

*Stellar Information Systems Limited, the market leader of data recovery industry, came up with new updates for the iPod recovery software for Windows*

**/24-7PressRelease/** - GURGAON, INDIA, August 02, 2008 - Stellar Information Systems Limited, the market leader of data recovery industry, came up with new updates for the iPod recovery software for Windows. The elegant product for the iPod recovery, Stellar Phoenix iPod Recovery V1.1, has been made better by the numerous efforts of the data recovery engineers. The software can now show the list of the files along with the name or creation date and time or sector number, at deleted file recovery. Many similar useful advantageous updates have been performed.

This software has been known till as the most standout solution for iPod recovery in all the cases and of the audio, video and image file formats. This newer version of the software has come with the plus points for the users. Equipped with the graphically rich user interface, the software effectively extracts all the recoverable files from the affected iPod. The key features of this latest version of iPod recovery software along with the earlier one's are enlisted as:

- The find option has been improved with the added 'Find Previous' option
- Improvement in the log report
- The file list will now appear with either the name of the file, creation date and time or the sector number.
- Compatibility with all the generations of iPod
- Support to Windows 2000, XP, 2003 and Vista
- Goes well with most of the audio, image and video file formats
- Offers advanced controls of 'Find' and 'Filter'

For knowing the software better, the company has made available it in the form of demo version too, so that user interface and the functioning of the software can be checked. You can later on buy the serial key to save the files.
