**A PROVEN HOSPITAL INTEGRATION SOLUTIONS - MD LINK**

*MultiMedia Dental Systems, Inc. selected MDI's Integration Engine - MD Link*

**/24-7PressRelease/** - TORONTO, CANADA, August 10, 2008 - MDI Solutions Limited today announced that MultiMedia Dental Systems of Roswell, Georgia has selected its **MD Link Integration Engine** software to support its dental software (Mediadent) implementations. MD Link will be used to provide the necessary interoperability between Dental Offices and Healthcare facilities and beyond.

A leading application platform provider in healthcare, MDI Solutions develops the MD Link integration engine, which includes a Meditech integration toolset. Mediadent Digital Imaging is the most widely used digital X-ray software world wide and is in use in 26 countries.

MDI Solutions and MultiMedia Dental Systems successfully collaborated on a joint integration project, which introduced MultiMedia to MDI and their MD Link software. MultiMedia quickly recognized the capability of MD Link to accelerate the time to develop interfaces with other vendor software and the extended connectivity that could be provided over traditional integration methods.

MultiMedia Dental Systems, Inc. was formed in June of 1999 for the express purpose of developing the next generation of dental software. Mediadent Digital Imaging was released in November of 2000 and it is now the most widely used digital X-ray software world wide.

About MDI Solutions

MDI Solutions offers a complete range of outsourced data integration and interfacing services to the healthcare industry. Data integration and systems interfacing provide a strategic foundation of interconnectivity, as healthcare systems strive to make better use of information technology. A strong integration infrastructure, based on qualified, professional resources that develop, manage and continually support it, is an invaluable asset to all healthcare organizations.

Medical:

MDI Solutions is committed to using leading-edge information technology for the ultimate purpose of improving patient care in our healthcare system. We offer outsourced services, develop and deploy data integration products that enable interoperability between medical systems.

Data:

Organizations large and small create and interact with billions of bytes of data on a daily basis. MDI Solutions respects the critical nature of healthcare data. Our services make patient information available to providers and decision-makers when needed, while maintaining the highest levels of data security and integrity.

Integration:

Integration is defined as forming, coordinating, or blending into a unified whole. MDI Solutions specializes in seamlessly

enabling disparate applications to communicate and work together through accepted, industry- standard mechanisms. Our technical staff are proficient with interfacing protocols such as HL7 and XML.

#### Solutions:

MDI Solutions believes that every data integration problem has a solution. MDI recommends, provides, and develops the most efficient, reliable, robust and cost effective integration solutions available. Our wide range of services and products can facilitate and monitor information exchanges with even the most 'legacy' of applications.
