Server Cloud Empowers Searches in INTSPEI P-Navigator

INTSPEI has announced an update to P-Navigator, the company's leading tool for professional Internet searching and navigating. The new beta release introduces Server Cloud, an innovative technology which provides users with a visual way to search.

/24-7PressRelease/ - NEW YORK, NY, August 16, 2008 - The International Software & Productivity Engineering Institute (INTSPEI) announced the important update to INTSPEI P-Navigator, the company's leading tool for professionally searching and navigating the Internet. The new beta release introduces Server Cloud, an all-new feature from the INTSPEI team of innovation experts.

About Server Cloud

Server Cloud is an innovative technology unique to INTSPEI P-Navigator which introduces users to the new, visual way to search. Server Cloud offers a fully visual map of Web sites that contain the most important and/or the most recently updated information about the search subject.

It highlights Web sites that are the most relevant to a certain search request by making the site appear bigger when the user commences a search.

Server Cloud can be used to narrow searches in a step-by-step manner or to visualize searches for faster and easier navigation. Searching within the results of a previous search to narrow the results is one of the most useful features of P-Navigator. Narrowing the search now becomes even easier and even more visual than ever before!

About INTSPEI P-Navigator

Designed by the team of leading scientists, INTSPEI P-Navigator is the result of years of research on user behavior while searching the Internet. Finally, an innovative, intuitively clear yet extremely comprehensive tool for professional searching and browsing the Internet has arrived. INTSPEI P-Navigator is designed to make searching and browsing the Internet a faster, easier and more rewarding experience, delivering results that are more comprehensive and more relevant to your thoughts.

P-Navigator is designed to perform deep analysis of the many Internet information resources. The tool presents search results structured into convenient hierarchies, shows links, connections and relationships between sites and pages, and allows users to narrow or widen search results within a semantic tag cloud quickly and easily. Simple surfing is now history. Go deep and explore the depths of the Internet with INTSPEI P-Navigator.

The beta version of INTSPEI P-Navigator is available for download from: <http://www.p-navigator.com>

About INTSPEI

The International Software and Productivity Engineering Institute (INTSPEI, <http://www.intspei.com>) concentrates on research and innovation. The company strives to deliver advanced productivity tools and innovative technologies based on the original award-winning research conducted by INTSPEI founders since 2001.
