Silver*Ware Studios Brings in the Oscar Winners

*Silver*Ware Studios bring you a martial art action film that will be centered in Atlanta, GA.*

/24-7PressRelease/ - DECATUR, GA, September 09, 2008 - Silver*Ware Studios (SWSI) will be producing in the next month a different type of action movie. This film has all the punches, kicks, guns, explosions, and visual effects. The feature is called Photo Finish. The film is based on a photographer (Arlean Collins) of an Atlanta Newspaper, who cleverly takes a picture of an assassin that kills the president of a bio-technical engineering company at a Press Conference. Now his employer, Mr. Phillips, wants the film back at any cost.

The film is scheduled to go into production in January 2009. The scenes are based around the Atlanta city area. SWSI is in negotiations with two Oscar winning actors for the lead roles. To play the hot tempered news Photographer would be Halle Berry. Halle is known for her athletic ability in films like Catwoman, James Bond: Die Another Day and the widely popular X-Men movies. This film might prove to be her most physically challenging role after having given birth to her little baby, Nahla.

The perfect counterpart to play the leading lady's partner (Steven Dole) in this martial arts action film is Oscar winner Jamie Foxx. Producer/Director Travis Ware made an offer to Jamie's people knowing that Berry's co-star and love interest called for biting wry humor and aggressively accurate marksmanship with many various weapons, such as he utilized in Miami Vice and Kingdom.

Ware said, "Halle and Jamie never worked together before, and I believe they would look great together. I think the chemistry will work amazingly well."

As her adversary, Silver*Ware Studios is also negotiations with Hollywood's Badboy, Colin Farrell for the role of Mr. Paul Phillips. Colin would play the Vice President of a Bio-Engineering company that has his boss assassinated to take over the company business, based in Atlanta, Georgia. Colin is known for his smart wit and dynamic acting ability. There is no word if he has taken the part as of yet.

The martial arts style of Aikido is an ancient Japanese style of the Samurai that was used after being thrown from their horse. It was first made popular by legendary martial arts star Steven Segal. If Halle takes the role, she'll take extensive martial arts training at The Aikido Center of Atlanta with Sensei George Kennedy.

Photo Finish will be the first martial arts film with an African American female in a leading role. Who else could carry such a motion picture, but the first African American female to win an Academy Award for Best Actress in a leading role? Amazing stunts, action and visual effects will give the audience just the right amount of "eye candy", in addition to a complex action-adventure story. SWSI is making history. Can you understand the multitude?
