**RSS Celebrates Crossing 25,000 TR Of Temporary Cooling Equipment Within Its Middle East Fleet**

*Dubai, Rental Solutions & Services LLC (RSS), a global provider of temporary power & a leader in providing cost effective and efficient temporary cooling installations has recently surpassed the 25,000 TR milestone of cooling capacity within its Middle Eastern operations.*

**/24-7PressRelease/** - Dubai, United Arab Emirates, September 11, 2008 - Increasing construction projects in the Middle East spurs the growth of temporary cooling, in particular, the expansion of mix-used real estate development projects. RSS plans to further expand both its current offering and add additional products into its Middle East fleet to further support its wide and diverse customer base.

Milan Balac, Managing Director of Rental Solutions & Services LLC says that "RSS started operations with a small fleet of chillers in 2007 and within 18 months of operations, it has surpassed an in fleet cooling capacity of 25,000TR. We are continuously expanding our cooling and power fleet and adding new products to meet the high market demand." Mr. Balac also stated that "RSS has received excellent support from the Bank of Scotland which in turn has helped to fast track our fleet expansion in both the cooling and power segments. The RSS finance facility has been significantly increased to an 8 digit USD sum, which demonstrates the Bank's confidence in our management team and our global expansion plans."

Lee Cox, General Manager of Rental Solutions & Services L.L.C. in United Arab Emirates mentioned that "our temporary cooling capacity has increased due to our ability to render excellent service across the board. Our HVAC team are experts in the temporary cooling field and hence our technical capabilities are excellent. District cooling and construction companies prefer RSS because we fully understand their requirements and deliver the results according to their exact specifications. We offer efficient equipment which saves money in operational costs, and we complete projects on-time, all the time. When you have these ingredients, your company will surely grow".

Colin Cav , GM for Northern Gulf says that "RSS is committed serve the rental cooling market across the Gulf region. Saudi Arabia, Qatar, Kuwait, Oman and Bahrain are all key markets and will provide growth opportunities. We are seeing great opportunities in several key cities including Dubai, Abu Dhabi, Dammam, Jeddah, Riyadh, Manama, Doha and Muscat".

RSS has also increased its temporary power capacity to 80MW to support its temporary cooling fleet and the rental power market. RSS is currently widening the capacities of its temporary generator fleet to meet the increasing and varying demand within the Middle East market.

**ABOUT RSS**

Rental Solutions & Services LLC (RSS) is a global provider of temporary power and a leader in rental cooling solutions in the Middle East, offering reliable equipment, flexible services and highly qualified engineers, available 24 hours / 365 days a year.

RSS Temporary Cooling Solutions: includes high efficiency air-cooled chillers; water-cooled modules, cooling towers and integral VFD pumps; wide range of fluid pumps for various applications; variety of certified high pressure flexible hoses; large inventory of fluid line components including double regulating valves, non-return valves, strainers and associated equipment; automatic make-up water and chemical treatment systems; in-house fabrication facilities for project-specific installation requirements such as headers, reducers and connection points; remote monitoring options are also available for all temporary chiller installations.

RSS Temporary Power Solutions: includes full range of acoustically containerized generators; distribution boards, change-over panels and junction boxes; extended range of environmentally safe fuel tanks; high current rating flexible power cables

for extreme ambient conditions.

RSS Turnkey Solutions: flexibility, rapid response and understanding the requirements of our customers are successful elements in providing turnkey solutions in power and cooling projects. Customers trust RSS because of our proven ability to provide reliable and realistic solutions for any situation.

RSS in-house engineering and fabrication facility enables us to fully support, manage and operate any temporary cooling and power application.
