UK Energy Saving Launches New Energy Saving Business Section of Website

Check out the new pages at www.uk-energy-saving.com dedicated to energy saving information for the workplace.

October 03, 2008 **/24-7PressRelease/** -- Popular consumer website <http://www.uk-energy-saving.com> has launched a new section focussing on energy saving advice for businesses. The ever-expanding website has previously concentrated mainly on providing information to individuals and families on all areas of energy saving and green living, but the new business section of UK Energy Saving will no doubt increase the appeal of the site.

Hayley Jones, Web Marketing Director for UK Energy Saving, explains the decision to add this new section to the website. "UK Energy Saving is known for providing information relevant to consumers, but there are also massive energy savings to be made by businesses. Whilst some of the information we already offer, for example with regards to renewable energy, has relevance for businesses, we decided to provide further insight into what businesses can do to save energy and what support is available to them in doing this. We already receive enquiries from people interested in finding out about energy saving for their business, and we hope that this new section will appeal to both employers and employees who are interested in the environment and saving money!"

The new energy saving business section of UK Energy Saving includes information on issues ranging from grants and recycling to jobs in the environmental sector and Fairtrade in the workplace, in keeping with the range of topics covered in other parts of the site. More pages are set to be added to this new section and the main energy saving business page, at http://www.uk-energy-saving.com/energy_saving_business.html, also provides links to pages within other sections of the site which are relevant to businesses as well as consumers.

UK Energy Saving is an information resource regarding anything relating to energy saving. Visit our site at www.uk-energy-saving.com
