"Seeing is Believing": Anti-Virus' Stellar Performance Creates a New Die-Hard AVG Fan

With support from Walling Data, Clyde Leslie learns to love his new anti-virus solution

HOLLY SPRINGS, NC, October 04, 2008 **/24-7PressRelease/** -- More than 80 million people across the world trust AVG Anti-Virus to protect their computers. One of them is Clyde Leslie of Miami, Florida.

Leslie is like most people: He wants an effective security software product to protect his computer from dangerous viruses and spy-ware. What he does not want, is to spend a fortune on the product or support.

"For years, I was running Norton on my computer but I got viruses all the time. On top of the hefty price tag, it was not worth it for me to continue using it anymore. So, I started to look for something else," states Leslie.

Leslie said he consulted with friends about the alternatives.

"Some friends said that AVG was much better than Norton, so I looked it up on the Internet and found out that there were a lot of people out there who agreed. I installed the Free Edition on one my computers to test it out," he remembered. "The Free Edition automatically caught dozens of viruses that Norton never detected so I hopped online to buy the full product from an Authorized AVG Distributor in the United States."

The Road to Walling

Through online research, Leslie discovered that Walling Data provides free and unlimited product support for the entire AVG Anti-Virus product line. He admits that added benefit made his decision to purchase from Walling Data an easy one.

Walling Data is the longest-standing and highest-volume distributor of AVG Technologies solutions in North America, and also the only distributor to offer all its customers free, unlimited, U.S.-based pre- and post-sales support.

"With some fantastic help from the guys at Walling Data, I got AVG installed on one of my computers and I've never had one single threat to my computer since. AVG detects threats then quarantines and then deletes them every time" replied Leslie.

Leslie continued, "Seeing is believing for me. I've seen what AVG can do so I would feel comfortable telling anyone, family member or stranger, to use AVG. It's the best antivirus software available."

Today Leslie has three laptops and though only one of them is running AVG, he admits it won't be long before all of them will.

"The computer that runs AVG operates so much better than the other two that are still using Norton. I cannot wait for my subscriptions to Norton to run out because I'm moving them over to AVG that instant!"

About AVG

Founded in 1991 and with offices in the US and Europe, AVG is a leading international developer of Internet threat protection solutions for consumers and SMBs. AVG is one of the fastest growing companies in the industry with more than 70 million active users around the world. The company employs some of the world's leading experts in Internet security, specifically in the areas of threat research, analysis and detection. AVG's award-winning products are distributed globally through resellers and over the Internet as well as via third parties through Software Developer's Kits (SDK).
