QNAP TS-509 Pro Turbo NAS Honored Editor's Choice from CNET France

The leading storage solution provider QNAP Systems, Inc. today announced its All-in-One TS-509 Pro Turbo NAS honored the Editor's Choice™ from CNET France for its high speed performance, simplicity of use, low noise level, and a full range of features.

TAIPEI, TAIWAN, October 04, 2008 **/24-7PressRelease/** -- The leading storage solution provider QNAP Systems, Inc. today announced its All-in-One TS-509 Pro Turbo NAS honored the "Editor's Choice" from CNET France for its high speed performance, simplicity of use, low noise level, and a full range of features.

The TS-509 Pro is designed for small business to enterprise users who require performance, features, capacity, and manageability. According to the test results from CNET France, the TS-509 Pro "breaks many speed records" and "it is 3 times faster than many of its competitors" in terms of file transfer and FTP transfer. It compares the write speed of the NAS by the front USB "one touch copy" to an "eye blink" as it breaks 30 MB/s. This affirms the outstanding performance for multiple concurrent data access of the TS-509 Pro. The editor, unable to find any drawback, also gave TS-509 Pro credit for its wide range of server features, for its ease of use with a clear GUI and its "smart" addition of a LCD that displays useful information such as the IP address.

Powered by Intel Celeron 1.6GHz CPU and 1GB DDRII memory, the 5-bay hot-swappable TS-509 Pro provides unique DOM architecture with embedded fail-safe dual OS. The Linux OS and applications of the NAS are embedded in the flash DOM that higher stability is guaranteed. The two Gigabit LAN ports can be configured as Failover, Load balancing, or serving two different subnets. Also, the TS-509 Pro supports RAID 0/ 1/ 5/ 6/ 5+Spare and JBOD, hot swappable hard drive design, a handy LCD panel for "Touch-N-Go" PC-less RAID installation and basic server configuration, schedule power on/off and Wake on LAN.

Moreover, the TS-509 Pro offers versatile server functions, e.g. File server, FTP server, printer server (max. 3 sets), DDNS support, Web server with built-in phpMyAdmin, Joomla, MySQL/ SQLite, editable php.ini, MySQL server, UPnP/DLNA media streaming (built-in TwonkyMedia server), iTunes server for music sharing, HTTP/FTP/BT download server etc. All these server functions can be shared among different users across Linux, UNIX, Mac, and Windows platforms. The TS-509 Pro is an ideal network-attached storage solution for modern business environment.

About CNET France

CNET.com is an influential online media that provides the latest news and reviews about the technology and consumer electronics. Their mission is to "show readers the exciting possibilities of how technology can enhance and enrich their life" and to "provide them with information, tools, and advice that help them decide what to buy and how to get the most out of their tech" (from CNET.com).
