PCDiskTools Software released PCNetworkClone 2.0

PCDiskTools Software today announced the release of version 1.0 of PCNetworkClone, one of its popular sharewares. PCNetworkClone is a Linux LiveCD based boot CD that allows cloning of computer hard drives to backup data or migrating system to other computers over network.

SYDNEY, AUSTRALIA, October 05, 2008 **/24-7PressRelease/** -- What is PCNetworkClone?

If you want to install systems with same configuration and software for 3 or more computers, as you noticed, it's a huge task that costs a lot of time and money. However, PC Network Clone can help you for its mass installation and deployment abilities with efficiency and stability.

PCNetworkClone is a Linux LiveCD based boot CD that allows cloning of computer hard drives to backup data or migrating system to other computers over network. A perfect solution for Home users to easily migrate his/her hard drive to a new computer over internet cable. Also an economical and comprehensive solution for Enterprises(School, Company, Cyber cafe) that need system mass installation and reproduction.

The most fascinating feature of PCNetworkClone is to deploy data on one computer hard drive to up to 20 computers concurrently with efficiency and stability. Over 65GB/min data will spread out into every target computers disks over network without losing a bit. Since it's a boot CD, even your Systems breaks down, hard drive cloning will also be your emergency assistant intimately. Leave your screwdrivers in your toolbox and bury forever.

_b_Areas of Use: _/b_
