**Pentegra Systems LLC's Patrick Cronin Attains LEED AP Accreditation**

*Patrick Cronin, Pentegra Systems LLC, Marketing Coordinator, has attained LEED AP accreditation. LEED AP accreditation is awarded through the U.S. Green Building Council; the USGBC is the national consensus for producing a new generation of buildings that deliver high performance inside and out.*

ELMHURST, IL, October 05, 2008 **/24-7PressRelease/** -- Patrick Cronin, Pentegra Systems LLC, Marketing Coordinator, has attained LEED AP accreditation. LEED AP accreditation is awarded through the U.S. Green Building Council; the USGBC is the national consensus for producing a new generation of buildings that deliver high performance inside and out. The USGBC is dedicated to expanding green building practices and education, and its LEED (Leadership in Energy and Environmental Design) Green Building Rating System.

The LEED Rating System supports global adoption of sustainable green building and development practices through the creation and implementation of universally understood and accepted tools and performance criteria. A LEED AP is an individual who has demonstrated the knowledge and skills necessary to participate in the design process, support & encourage integrated design and streamline the LEED application and certification process.

LEED AP accreditation strengthens Pentegra's qualifications when responding to RFPs requiring a LEED AP and provides additional resources for green building as it relates to Pentegra's solutions when preparing to participate in a LEED project.

Pentegra Systems would like to congratulate Mr. Cronin on his commitment and perseverance to add the LEED accreditation to the solutions and resources that Pentegra Systems has to offer.
