New Registry Cleaner for Windows Vista Released By Digeus

Digeus, Inc. has announced the release of Registry Cleaner for Windows Vista, a PC maintenance and recovery tool that eliminates system error messages, slow startup and shutdown speed, programs instability and computer crashes.

ALBANY, NY, October 05, 2008 **/24-7PressRelease/** -- Windows registry is one of the most vital components of the PC. It stores information about Windows system and all application programs installed on the computer. Whenever user works with computer, uses Internet or runs any application the registry is changed. Windows Registry is always under the threat of potentially dangerous records left in the registry behind by deleted programs and utilities. All corrupted registry entries can damage Windows registry and dramatically slow down performance even of the newest computer.

"Our goal is to provide our customers with the best software services that will help users to keep their PCs performing at top speed," said John Fister, senior president and chief software architect at Digeus, Inc. "Thus we have developed Registry Cleaner that can provide users with an expert help when they perform diagnostics or try to optimize the most vital parts of their PCs."

With Digeus Registry Cleaner even newbie computer user can perform complex operations on Windows registry optimization by himself without having to upgrade hardware. Digeus Registry Cleaner is designed to scan, optimize, clean and repair the Windows registry quickly and easily.

Digeus Registry Cleaner quickly identifies invalid references, corrupted DLLs, orphaned startup programs and invalid system records within the registry.

The product has seen many technological improvements. Below, there are some of the advancements that make it stand out:

Digeus Registry Cleaner scans, locates, cleans and optimizes the following registry entries:

- Missing shared DLLs, unused file extensions, files and folders that no longer point to the correct objects;
- Invalid application paths, start-up programs or missing shortcut references that take time when startup or shutdown PC;
- Invalid ActiveX & COM that no longer point to the correct controls;
- Invalid installer references that are no longer used or have been moved.

Other significant advancement of Digeus Registry Cleaner is its wide range of Windows supported platforms. Digeus Registry Cleaner for Windows Vista supports Windows 95/98/ME/NT/XP/2000/2003.

Pricing and Availability

Digeus Registry Cleaner runs under all versions of Microsoft Windows and costs \$17,99 (USD) for a single-user license. Licensed customers are entitled to the fully-functional version of the product and free technical support. Further information on Digeus Registry Cleaner as well as a free trial copy are available free of charge from <http://www.digeus.com>.
