TOPEX joined the Corporate communication system event through its Ukrainian partner, A-KOM

TOPEX products and solutions were presented to Ukrainian market on 1st of October at "Corporate communication systems" event at Kiev.

BUCHAREST, ROMANIA, October 09, 2008 **/24-7PressRelease/** -- Located in Ukraine, A-KOM is a company with over 4 years of experience in the field of telecommunications, based on advanced technology which ensures rapid growth in this industry. Along time, the company has managed to convince the operators and corporate clients of its telecommunications equipment high quality.

TOPEX products and solutions became available for Ukrainian market as a result of the agreement signed between local company A-KOM and TOPEX Romania. This partnership is to distribute and provide service support for TOPEX NGN - Next Generation Networks and FMC - Fix to Mobile Convergence solutions in this market.

During Corporate communication systems event, where companies like CISCO, Avaya and Alcatel-Lucent were sponsors, A-KOM had a presentation in the first quarter of the day and also, in order to dramatically increase the communication effects with attendees they have arranged a special meeting renting a conference room. About 230 attendees have participated at this meeting and they had the opportunity to visit the demo booth intended for TOPEX products. They could test real equipment samples in work, take a look on equipment functionality, have advertising information and discuss possible applications and upcoming projects they may have.

"Exhibiting TOPEX products at this event was due to our considerable attention to attract on the Ukrainian market advanced technologies and equipment of world leaders.", said Mrs. Tatiana Nasedkina, CEO A-KOM. "We choose for distribution high-quality equipment suppliers, whose main clients are leading European fixed and mobile operators, as well as corporate structures, and TOPEX fits perfectly our demands.", added Mrs. Nasedkina.

About A-KOM

The company A-KOM counts on those technologies, that help to improve the quality of communication, facilitate interaction and ensure customer savings time: multiservice networks (data, audio and video on a single corporate IP network, based on copper or fiber cables), audio and video conference, studio (for telephone communications, discussions and debates, meetings and congresses), gateways (GSM and VoIP gateways), voice processing system and terminal equipment (telephone sets, special telephones).
