**ISIS Services Welcomes Alex LaBeaux**

*ISIS Services appoints Alex LaBeaux as their Director of Sales and Marketing*

SAN CARLOS, CA, October 09, 2008 **/24-7PressRelease/** -- In an announcement made today by Jorge L. Garcia, Founder and Chief Scientific Officer of ISIS Services, the contract research organization proudly welcomes Alex LaBeaux as its Director of Sales and Marketing. LaBeaux, based out of ISIS Services' San Carlos facility, will be responsible for spearheading business development efforts for the organization nationwide.

"We are pleased to have Alex on the ISIS team and are confident that his extensive experience in the medical device industry, combined with his strong sales and management background, will enable him to provide the solutions that our current and new clients need to expedite their products to the marketplace," said Garcia.

LaBeaux has over 15 years of experience in the medical device industry and has excelled in a variety of senior level sales and management roles in both the medical device and consumer products sector. Prior to joining ISIS Services, LaBeaux served as a Regional Sales Manager and Sales Representative in the cardio/peripheral-vascular and oncology divisions of Boston Scientific, where he received numerous achievement awards, including President's Club, through his demonstration of exceptional sales and leadership abilities.

LaBeaux received his Bachelor's Degree from the California State University, Hayward and also performed undergraduate work at the University of California, Berkeley. He can be reached at (510) 704-0140 or via e-mail at [a.labeaux@ISIS-Services.com](mailto:a.labeaux@ISIS-Services.com).

With over twenty-five years of experience in comparative medicine, ISIS Services has established a reputation for excellent science, strong surgical and clinical skills and customized, timely services. We are the longest running, fully independent contract surgical facility and have been conducting GLP studies since 1985.

ISIS Services offers specialized services that support every step of your project goals—from prototype development and GLP clinical trials to surgeon training and market expansion studies. At each of these steps, ISIS Services provides expert capabilities in comparative medicine, surgery and pathology to help optimize device design and performance. Our pre-clinical GLP and non-GLP capabilities range from feasibility studies, to safety and efficacy assessments, to physician and sales force training. The scope and nature of these studies includes: cardiovascular, orthopedic, gastrointestinal, urogenital, dermatological, and wound healing-- with an emphasis on medical device development and biomaterial testing.

ISIS Services employs a full-time veterinary and physician staff and a highly trained and experienced technical team. We work directly along side our clients and support every step of your efforts to enter the marketplace.
