Unbelievable offers on Website Design Packages at Mysitelogo!

Visit Mysitelogo for getting great website design packages. Business websites designing is a technical art at which the site excels and it offers a great variety of choice to the customers.

LAS VEGAS, NV, October 10, 2008 **/24-7PressRelease/** -- Business websites designing is an art and needs a lot of creativity. A good website leaves a lasting impression on the mind of the person viewing the site. So, to catch the pulse of the target audience one has to have a custom website design to promote ones' business. With the latest technological changes that the internet has brought about, things have become so easy to procure on the net and the competition has become only stiffer by the day. In order to survive in this competitive world one has to spend a considerable bit on website designing. Mysitelogo has a dynamic website designing expert team who look after the website designing services of the site. This site has been offering its services in this area since quite a long time and over the period of time it became its forte. Apart from this the site has launched a number of Website Design Packages that come at a very reasonable and affordable price. The site offers custom website design services that fully support the business goal. There is a lot of ordeal that goes into building or designing a website. This entire arduous task is looked into by the creative team at Mysitelogo. The site believes in the principle "what you see is what you get". There are no extra charges or taxes that will be collected.

The site offers an exotic five website designing packages. The first package comes as a one page package at \$599. One custom home page with two design concepts and two revision rounds are given under this package. Next package comes at \$999 where five pages are given including a custom home page and two design concepts and revision rounds are allowed. Ten page package and a fifteen page package come at \$1299 and \$1499 respectively. These two packages come with a unique subpage and a custom home page. The design concepts offered for the former are two and for the latter are three. However, one gets the same number of revision rounds to incorporate any significant changes or inputs necessary to make it look like the desired one. The last package is the custom package where the number of pages varies on the custom needed by the client. The price of this package also varies according to the requirement of the client. All the website design packages get an add-on in the photo segment and external links and mouseovers come by default. The site guarantees total satisfaction in all the packages as it has a team of great expert designers to look into the dynamic website designing process.

Visit their website gallery to glance at the various websites that the creative team has designed. The website designing services are offered to all kinds of businesses ranging from small business owners to top companies in the world. One could also come to the site to refresh their already existing website design by replacing it with a more vibrant, well-crafted, affordable one.

The dynamic website designing process has to pass six steps or stages to arrive at the customized website that fits bests your tastes and your business needs. Initial step is to identify the company's objectives to arrive at the design project. All the latest state-of-art internet advancements will be incorporated into the new website design. Next is to finalize about the target audience to whom you want your website to address. Then is the stage of constructing the information structure for the website. By balancing functionality and beauty of the website the website technologies that will enhance the quality of the site will have to be incorporated. Mysitelogo will create a detailed design specification such as layout, color, link structure, navigation so on and so forth. Once all these stages have been fully satisfied, the creative team at Mysitelogo will fully test the site's functionality to ensure that the internal and external links are functioning, it opens quickly on the internet explorer, Mozilla Firefox etc. The team also tries to ensure that the website loads quickly on to the webpage.

The testimonials prove that the site has been doing commendable work in website designing services. First impression is the best impression. The team at Mysitelogo creates such magic with the website designing that it brings back the customers for using their other services too. The site offers ten reasons why one should utilize their website designing services. In their opinion they are best price providers with unsurpassed quality. They function with a highly experienced designer team to create custom websites for each company. Mysitelogo is synonymous with speed and efficiency. Your orders are executed with great care in trying to bring your dream to reality. They have an idea about the requirements of the customer and know very well what formats are necessary for what kind of business. This site prides in the fact that they

have a customer care department but not a customer support department where they take care of designing your dream. Customer satisfaction is their top priority and the expert design team works endlessly in maintaining the same. The site values the privacy of the customer and does not reveal any kind of information to a third party.

The site also provides similar quality services in logos, business cards, stationery, brochures, and banners designing where a group of diligently working people strives to attain perfection to give life to the dream you envisage for your website or logo. This is a one stop shop for all the above mentioned wide range of services. Take a look at the logo gallery, website galley, brochure gallery, banner gallery only to confirm that their work speaks more volumes than what is written on their website. Business websites designing was never more so smoothly executed with such great outputs.
