ADVANCED VEIN THERAPIES ANNOUNCES MOVE TO EXPANDED OFFICE IN NOVI, MICHIGAN

Advanced Vein Therapies, specializing in the treatment of varicose and spider veins, recently moved its medical office to a new, larger nearly 4,000 square-foot office in Novi, Mich. to accommodate its continued growth, enhanced services and the latest technology.

NOVI, MI, October 10, 2008 **/24-7PressRelease/** -- Advanced Vein Therapies, specializing in the treatment of varicose and spider veins, recently moved its medical office to a new, larger nearly 4,000 square-foot office in Novi, Mich. to accommodate its continued growth, enhanced services and the latest technology.

"All consultations and treatments take place within our office, and we needed more space to accommodate our growing client base," said Jeffrey H. Miller, M.D. "At the same time, we wanted to create a soothing, therapeutic environment through a more contemporary office design and layout, and this space allowed us to do just that."

Advanced Vein Therapies offers the latest technology and medical care available for vein procedures and is among an elite few in Michigan devoted entirely to this discipline.

The new office is located at 46325 W. 12 Mile Road, Ste. 335, in the Keystone Medical Building, in Novi, Mich.

Advanced Vein Therapies has established itself as Metro Detroit's premier medical office for the treatment of varicose and spider veins. Utilizing state-of-the-art technology in a world-class medical facility, Advanced Vein Therapies offers the latest in medical care for the vein patient. As of January 2008, Advanced Vein Therapies' Jeffrey H. Miller, M.D. is one of only two American Medical Association registered phlebologists (physicians who specialize in vein disease) in Michigan.
