Gazaro Selected to Present in VentureDemo at the Ottawa Venture & Technology Summit

Gazaro, a personalized sales flyer platform that is revolutionizing the classic paper sales flyer, has been selected to present to an audience of more than 200 attendees at the Ottawa Venture & Technology Summit (OVTS).

OTTAWA, ON, CANADA, October 11, 2008 **/24-7PressRelease/** -- Gazaro, a personalized sales flyer platform, was selected to participate in VentureDemo at the 12th annual Ottawa Venture & Technology Summit (OVTS) on October 8th at the Chateau Laurier.

Gazaro was selected to participate in VentureDemo based on its unique Artificial Intelligence (AI) platform for filtering, categorizing, and personalizing content in real-time. The Gazaro website (www.gazaro.com) gives consumers a unique and customized flyer of the biggest sales on things they are interested in buying. Gazaro uses artificial intelligence to filter off irrelevant or misleading sales, publishing only the biggest and best deals into an individual consumer's personal flyer.

"The focus of the Gazaro platform is entirely on sales, and not on regularly priced items. We believe that you shouldn't have to manually scour flyers, websites, and forums each day to find the best deals in your own city," explains Sam Zaid, Gazaro's CEO. "Gazaro is really about helping to solve the information overload problem, particularly with the Facebook generation that rarely has the time or patience to browse through newspapers or flyers."

OVTS is an attractive event for start-ups because of the networking and demoing opportunities. The event attracts business leaders, industry experts and investors.

"As a start-up, the opportunity to demo to a large audience all at once is invaluable," says Zaid. "OVTS screens participants to provide a common forum where both investors and attending companies are on the same page, which is very helpful and saves us a lot of time."

About Gazaro

Gazaro is a personalized sales flyer platform that aggregates and classifies sales found in flyers, catalogs, and websites in real-time using a patent-pending Artificial Intelligence system. Gazaro enables users to create unique and personalized flyers of the biggest sales in their local area on things that match their shopping interests. Users subscribe to their unique personalized flyer through a number of electronic mechanisms including daily or weekly emails, RSS, and desktop gadgets. For more information, visit <http://www.gazaro.com>.

About the Ottawa Venture & Technology Summit

As the region's premier risk capital event, the Ottawa Venture & Technology Summit permits participating companies to present directly to a large audience of local and foreign investors. This year's participation was open to both early and mid-stage companies which were chosen based on their appeal to investors. The 12th Annual Ottawa Venture & Technology Summit is an OCRI initiative (www.ocri.ca). It was held on October 7-9 at the Chateau Laurier.
