Dryer Vent Cleaning Prevents Fires and Reduces Energy Bills - Consumers in Raleigh, NC are Thankful for Jim Buie's Service and Dedication

Energy costs for households average \$1,900 per year in the US; clothes dryers are one of the most expensive appliances to operate

RALEIGH, NC, October 12, 2008 **/24-7PressRelease/** -- Jim Buie, owner of Dryer Vent Wizard in North Carolina is dedicated to promoting fire safety and consumer awareness of the danger of lint build-up in dryer ducts. Home owners who think its normal for their clothes dryer to take more than one cycle to dry a load of laundry are in danger of starting a fire due to clogged dryer vents. Jim explains to his customers that lint accumulation in dryer vents causes a dryer to over heat and to run inefficiently, causing fires and increasing energy usage.

"With rising energy costs, I feel it is my role is to educate consumers as I provide dryer vent cleaning services," said Buie. "My job is not finished until my customer understands the importance of dryer vent maintenance to keep their dryer running efficiently and to reduce energy consumption and costs.

Jim tells his customers how important it is to have their dryer vent systems professionally cleaned annually and to make sure their system meets current UL standards. Jim explains, " Plastic, vinyl or foil vents are no longer up to code; they should be replaced with semi-rigid or solid metal venting." Jim also makes sure his customers know how to properly maintain their dryer vent system between annual professional cleanings.

Jim receives letters, emails and phone calls from thankful customers, for example, he recently received this one, "Dear Mr. Buie, Thank you very much for your quick and professional follow-up. The vent tray cleaning tool I asked for arrived Monday, July 21 via priority mail. I am 100% satisfied with your service and will not hesitate to recommend it to others. With such dedication to customer satisfaction, your business cannot help but to grow and be successful. Best regards, Satisfied Customer."

If clothes take more than one cycle to dry or there is no visible lint on the dryer screen, chances are there is a clog in the dryer vent. Dryer Vent Wizard, Dry Clothes, Safe Homes is the largest chain of dryer vent specialists in the U.S. <http://www.dryerwizards.com> services Northeast North Carolina, including Wake County, Johnston County, Orange County, Durham County, Franklin County, Warren County, Wilson County and neighboring cities and communities.
