Church Library Organizer Pro - New Database Solution For Church Libraries.

New database solution offers church libraries a flexible tool to manage library.

SURREY, BC, CANADA, October 12, 2008 **/24-7PressRelease/** -- PrimaSoft PC introduces Church Library Organizer Pro, a library solution that is easy to use and very affordable. Our library software serves the library organization needs of any size churches, synagogues, mosques, and temples.

Church Library Pro solution is designed to help you with the following activities: quickly catalog your church library items (books, videos, dvds, cds, documents...), record information about patrons of your library, easily process loan and return transaction.

"We are very excited with this library database solution" says Andrzej Brzezinski, product manager. "It's simple to use at the same moment includes all generally required library features. We can offer this product for very affordable price because it's based on our Organizer Pro database management system. Our database management system and specialized circulation data field allow us and users to create library solution in days not weeks or months. Additionally, the system does not limit the user to one solution. There are over 100 other database templates available on our site. For example if library administration wants to track assets, no problem, we offer several asset/inventory templates ready to download and use and they cost nothing."

Church Library Organizer Pro for Windows costs \$245 (US) plus shipping and handling, and is available from PrimaSoft PC. Network and site licenses are available. You can download a fully functional trial version of the software from the Info page: http://www.primasoft.com/pro_software/church_library_software_1.htm
