iZ3D Goes to War with Shadeleaf Mercenaries Online Gaming Guild

Company Teams with Popular Warhammer Guild to Provide Support and Offer 3D Monitors as Competition Prizes

SAN DIEGO, CA, October 15, 2008 **/24-7PressRelease/** -- iZ3D, LLC, designer, developer, and marketer of advanced 3D visualization systems, is pleased to announce that it is now a sponsor of Shadeleaf Mercenaries, a popular online guild site for the new fantasy Massively Multiplayer Online Role-Playing Game (MMORPG) Warhammer™ Online: Age of Reckoning[®]. Poised to be a popular web destination for new Warhammer gaming enthusiasts, the site offers great game play for both casual and serious gamers. Visit <http://www.shadeleafmercenaries.com>.

"We are thrilled to have iZ3D and its popular 3D monitors as a sponsor. By teaming up with iZ3D it allows us to offer more gaming entertainment to our members, plus have some fantastic 3D display prizes for future competitions!" said David Salls, Shadeleaf Mercenaries Guild Leader. "By upgrading to a iZ3D monitor, our viewers can explore their Warhammer realm in stereoscopic 3D with us."

"iZ3D offers a complete 3D solution for gaming enthusiasts. We offer a great 3D monitor and the best drivers on the market. We are pleased to provide further support to the gaming community by sponsoring an established guild site such as Shadeleaf Mercenaries. Our 3D monitors will add an extra dimension of intensity into the Warhammer game and provide users the opportunity to experience the rich 3D graphics that this popular MMO has to offer," remarked Thomas Striegler, CEO of iZ3D, LLC.

iZ3D monitors feature significant advantages over other 3D display systems. Gamers that want to experience spectacular game graphics will appreciate playing in stereoscopic 3D. Graphic artists have embraced the iZ3D monitor as an essential tool for 3D design. It is difficult to create images in 3D while viewing the design on a flat 2D screen. 3D movie buffs can now bring the thrill of watching a 3D movie home.

The company developed this unique technology to create an adjustable 3D environment without causing eyestrain, spatial disorientation, or headaches. In 3D mode, viewers can see bright, sharp 3D images and video simply by wearing any iZ3D passive polarized glasses. Existing PCs equipped with a dual-output video card easily powers the display. Specifications include: 1680 x 1050 resolution; up to 170-degree 3D viewing angle; 5ms response time; 700:1 contrast ratio; and 16.7-million colors. The monitor is available at www.pcmall.com, <http://www.amazon.com> and www.iZ3D.com.

About Shadeleaf Mercenaries

Shadeleaf Mercenaries is a perpetual guild that has existed/exists in a number of MMO's including EQ1, EQ2, WOW, FFXI, DAOC, EVE, DDO, LOTRO, UO and RGTR. The name Shadeleaf Mercenaries came to be during a D&D session in 1995. The guild originally began as a small group of real life friends and now has members all over the world. This site is dedicated to the newest chapter of the guild who will be siding with the forces of Destruction in order to crush the Alliance of Order in Warhammer Online Age of Reckoning. About iZ3D, LLC

iZ3D[®] LLC is a leading innovator of 3D stereoscopic viewing display solutions. In addition to the design and marketing of 3D LCD displays, the company enables 3D content creation, and promotes the accelerated proliferation of 3D for entertainment and professional applications.

To present an uncompromised 3D experience, company's development approach to 3D stereoscopic viewing includes optimizing solutions for gaming, home entertainment, and professional applications. Each solution is compatible with multiple graphics cards and includes iZ3D high-performance LCD displays, lightweight passive polarized glasses, and blazingly fast software.

The company is also developing next generation solutions and enabling content for home entertainment and professional

applications needing 3D displays to view visually rich movies, photos, and 3-dimensional graphics with amazing depth, brightness, and resolution.

iZ3D was formed as joint venture of Taiwan-based Chi Mei Optoelectronics, a worldwide leader in TFT-LCD manufacturing and Neurok Optics LLC, a US-based 3D technology developer and marketing company. The company distributes its products directly at the iZ3D online store and through major online and retail outlets. Please visit www.iz3d.com or call 858.646.3015 for more information.
