

Oakbrook Terrace, IL Dentist Mends Patient Smiles With Dental Implants

Dr. A. Garrett Berley Jr. and his dental team offer dental implants for Oakbrook Terrace patients as an alternative to dentures.

OAKBROOK TERRACE, IL, April 20, 2014 **/24-7PressRelease/** -- When a patient is missing a tooth, or multiple teeth, the last thing he or she wants to do is settle for gaps in their smile. This can cause low self-esteem and anxiety in public situations. To help eliminate gaps, Dr. A. Garrett Berley Jr., a Oakbrook Terrace dentist, is proud to offer dental implants at his practice. With the advancements in dentistry today, dental implants are frequently the best option for replacing missing teeth and restoring smiles.

A dental implant is an artificial tooth root that is placed into a patient's jaw to hold a replacement tooth or bridge. This procedure is ideal for people in good general oral health who have lost a tooth or multiple teeth due to periodontal disease, injury, or other reasons. While dental implants may be high-tech in nature, they are more tooth-saving than traditional bridgework, since they do not rely on neighboring teeth for support.

"No one ever wants to lose a tooth, yet alone multiple teeth. Thankfully, with advancements in dentistry, I am able to offer my patients the restoration they need to smile once again. Dental implants help me to maintain my patients' smiles so that they no longer need to be ashamed to smile," said Dr. A. Garrett Berley Jr., an expert in dental implants in Oakbrook Terrace.

Rather than resting on the gum line like removable dentures, or using adjacent teeth as anchors like fixed bridges, dental implants are long-term replacements that are surgically placed in the jawbone. Dental implants are composed of titanium metal that "fuses" with the jawbone through a process called osseointegration. They never slip or making embarrassing noises that advertise the fact that a patient has "false teeth." Additionally, dental implants do not decay like teeth because they are made of metal and there is no tooth structure to decay. With proper care they do not become loose because the metal of the implant is integrated with the jaw, which also helps eliminate bone loss.

Whether patients are searching for teeth whitening or dental implants in Oakbrook Terrace, or other services, they turn to Dr. A. Garrett Berley Jr. and his experienced team of dental professionals for quality care they can trust. To learn more about Dr. A. Garrett Berley Jr., his dental team, or any of the services provided at his dental practice, patients are encouraged to visit this Oakbrook Terrace, IL dentist's comprehensive dental website that is located at <http://www.agberleydds.com>.
