

FunnelBrain™

CREATE. LEARN. SHARE.

RAISE SCORES BY COLLABORATING WITH OTHER STUDENTS FROM AROUND THE WORLD!

Create, Learn and Share Flashcards

Create and personalize your review questions: include videos, photos, voice recordings, and even math equations. Share your questions and collaborate with your classmates and other students around the world by working on a common set of flashcards together.

Enhance Your Profile and Add Your Friends

Add a profile photo and include your name so your classmates can find you. Update your information with your classes, your school and all the groups you've joined. Then, use the Add Friend feature to build your study community. Your profile is automatically updated with study materials you save, create and review on FunnelBrain.

The FUNNEL – FunnelBrain Can Help Pace Your Studying

Funnelbrain's unique FUNNEL application always presents you with the right question at the right time. It uses a spaced repetition algorithm to keep track of what you've already learned and what you still need to be learning. Simply enable the learning mode when viewing any flashcard and the FUNNEL will track your progress from there!

Flashcards Don't Have Two Sides Anymore

On FunnelBrain, you can add a third side to any flashcard. (Try that in the real world! You'll probably end up with a papercut.) Use videos, images, and text to explain a difficult concept, or to share a favorite mnemonic device.

Create and Collaborate in Study Groups

Create study groups and invite your classmates and friends from FaceBook, MySpace, and Gmail! Add photos (hopefully educational ones) and have real-time discussions in the message forum. Groups are designed to help you work together with other students in your class—or on another continent.

About FunnelBrain LLC

FunnelBrain.com is an academic question and answer site that provides an environment for collaborative online learning. Students work in teams to create review questions and answers, paired with video explanations, for academic subjects. Users have access to wiki-style content creation tools, as well as a learning management application known as the "Funnel" that monitors learning progress with a spaced repetition algorithm. FunnelBrain is a trademark of FunnelBrain LLC.
