

PAUL CHEHADE

FOR PRESIDENT OF THE UNITED STATES OF AMERICA

OUR PLATAFORM WILL BE BASED ON THE FOLLOWING PRINCIPLES ...

FAITH IN OURSELVES
PATRIOTISM
SECURITY
JUSTICE • ETHICS
HONOR • FAMILY • SAFETY
DIGNITY • DIVERSITY • EQUALITY
DISCIPLINE • DUTY • SERVICE • WISDOM
TOLERANCE • MORALITY • HUMANITY • BRAVERY
ACCOUNTABILITY • PARTICIPATION • INNOVATION
COOPERATION • SINCERITY • INDEPENDENCE • CREATIVITY
UNDERSTANDING • SPIRIT • EDUCATION • MERCY • FAIRNESS

Dear fellow Americans,

It is time for all proud Americans to return to our values, to the foundation of our nation. We have had enough of politics and partisan privileges.

The hard reality is that both major parties, that have controlled our country for so many presidencies, continuously fail to bring prosperity and undermine our most sacred rights, the freedom to live with dignity and peace in our hearts.

It is time to do what is best for our nation and its people and not what a handful of influential economic powers dictate for their sole benefit.

It is for this reason that, after consulting with my family, colleagues and friends around the country, I have decided to intent to qualify for the presidential candidacy of this great nation, praying to GOD for guidance and protection in this most difficult endeavor.

I am not a politician, nor a millionaire. I am just a simple person like most of us that loves and cares for our country and just cannot stand our nation's unsustainable situation anymore.

I will not repeat the same political phrases candidates say in their speeches when they are campaigning and then not fulfill their promises. My main issue will be, to once and for all, unite our nation under the umbrella of our founding fathers and protect our freedom, peace and prosperity.

As an example of our political platform, we will push for a law that protects our low income senior citizens from paying taxes on their homestead and secure their basic needs are met.

We will protect the rights of our men and women in uniform, especially the ones that fought for our country to protect our rights and freedom. We will guarantee that, at their return, they will have secure jobs and their families will be guaranteed that their basic needs will be covered.

Since the basis of our nation is made of honest and hard working immigrants, we cannot tolerate discrimination in any form.

if one of the problems of our nation is illegal immigrants, we should contemplate the possibility of legalizing all these immigrants so they can start contributing to this country by paying taxes like all of us and by spending and investing their money in our country.

We need and we must implement a new solid and secure system to protect our borders and one option could be using the expertise of our armed forces to avoid the immigration problem in the future.

I am against the new health law for two main reasons. First, the cost of implementing this law will contribute to bankrupt our nation. Secondly, our government cannot impose a paid insurance to every citizen; it goes against our freedom of choice.

We need to find a solution to the healthcare problem in America and find avenues to provide free insurance to the low income people and reasonable and affordable insurance premium for the rest of the population.

Internationally, I will start to give priority to our American Continent. I believe it is very important to have a long lasting relationship with our neighboring countries and work in unity for a better future of our continent.

Our continent is so rich that we have all the major resources for future generations. We need to give priority to all the products “Made In America” and rebuild the manufacturing industry that will give jobs to our people.

And last and more importantly, we need to address the rampant spending that is pushing our nation to the brink of collapse. Our deficit is like a cancer destroying our country from within.

I have a question for you. How confident are you in our nation’s future with the current trend of economic policies?

I only ask all Americans with solid values that love this country like I do to help me restore the faith and principles of our founder fathers and return this nation to be admired again as a great nation.

God bless America.
