No More Running Out of Checks
- Laser Check Printing Software from Halfpricesoft is Like Having Unlimited Checks

Remembering to order more checks is a pain. The new ezCheckPersonal from Halfpricesoft.com eliminates that hassle, allowing customers to print checks right from their computer and laser printer.

Few things are as frustrating as sitting down to pay the bills and realizing the checkbook has run out of checks. Customers of Halfpricesoft.com's ezCheckPersonal never have this problem. With this easy-to-use laser check printing software installed on a home computer, customers have a nearly unlimited supply of checks.

Louisville, Ky.-based software developer Halfpricesoft.com specializes in creating software that is ready to use as soon as it's installed; no long learning curve or bulky user manuals. ezCheckPersonal's intuitive interface guides users step-by-step through entering bank information and setting up checks. In less than 30 minutes, users are generating their own customized checks.

"Nobody wants to spend hours learning to use software to write checks, and writing out the same checks for the same bills month after month is tedious," said Halfpricesoft.com founder Dr. Ge. "We developed ezCheckPersonal to make check writing and bill paying quick and painless, and to eliminate the hassle of remembering to order checks."

While printing checks at home from a laser computer does require special check paper, check-printing paper is readily available at local office supply stores — for ezCheckPersonal customers there's no more waiting weeks for more custom checks to arrive while bills go unpaid. Plus, customers can get 50 pages of laser check stock (150 checks) free when purchased at the Halfpricesoft.com website using TrialPay.

ezCheckPersonal application is highly flexible with a wide variety of options to suit the needs of each customer:
- Print on standard size checks or on 8 ½ x 11-inch pages with 3 or 4 checks to a page
- Customize check layout for a personalized look when printing on blank check stock
- Print on checks pre-printed with banking and personal information if preferred
- Print checks formatted for use with QuickBooks
- Save check information for checks written regularly, like mortgage and utility payments, to speed up bill paying
- Supports an unlimited number of bank accounts for families with multiple accounts
- Save signature as an image file and print signature on checks automatically
- Easy to use report feature helps users record and track checks they've written

- Easy-to-use data export feature enables users to use ezCheckPersonal data with other software

ezCheckPersonal software available for free download and 30-day trial
Customers can try ezCheckPersonal risk free and be sure it meets their needs. The full version of the software can be downloaded without cost or obligation at http://www.halfpricesoft.com/check-printing-personal-software-download.asp Customers can sample ezCheckPersonal free for 30 days. The downloaded software is fully functional for 30 days and includes all features of the full version.
