

Liteye and Red Six “Sharpen Their Blade” against the Iranian small UAS Threat

Liteye’s Anti-UAS Defense System and Red Six threat analysis provides current and future defense against small UAS

Liteye’s Anti-UAS Defense System (AUDS)

Centennial CO, USA, July 30th, 2019 - Liteye Systems, Inc, is excited and pleased to announce it is teaming with a red team strategic advisory company, Red Six Solutions, LLC. Liteye is the manufacturer, integrator, training, and services provider of the Anti-UAS Defense System (AUDS) currently being utilized by the U.S. Government for countering Unmanned Aerial System threats being used by adversarial militaries and terrorist organizations worldwide. With over \$60M in government contracts, Liteye is an industry leader in the counter UAS market. Likewise, Red Six Solutions is a highly regarded red team company specializing in the global analysis of the small UAS threats. Red Six provides its clients “over-the-horizon” insights into the UAS challenges being posed against our military and law enforcement.

Kenneth Allen Geyer, CEO of Liteye System explains “Liteye is constantly improving our AUDS offerings to ensure they are an effective counter UAS system against relevant threats. Working with Red Six analysts allows Liteye to plan and test against emerging threats, ensuring the safety and mission of our military forces”. Mr. Geyer goes on to say “the modifications we’ve made to our original prototypes were largely based on red teaming exercises. Red Six provides that look into-the-future that has allowed AUDS to be effective in combat against threats being used by ISIS, Iran and others”.

Red Six Solutions has extensive knowledge and expertise in replicating the capabilities and tactics of UAS threats. According to Dr. Scott Crino, CEO, Red Six Solutions “Our industry leading experts travel the globe to learn about the threat and to assess the commercial counter UAS marketplace. Our technicians dive deep into the components being used or expected to emerge on battlefields around the world.” Dr. Crino said, “We can take the state-of-the-art components, build replica threat UAS and test them in relevant environments against Counter UAS systems like AUDS. Sharing this information with teammates like Liteye, gives them a significant advantage in maintaining their edge over the threats.”

Liteye and Red Six will continue to participate in US Government tests and exercises. Liteye will showcase AUDS and other Liteye capabilities this September, in Las Vegas at the InterDrone Conference and Expo 2019. There, Scott Crino will join Ken Geyer as a subject matter expert to explain the threat posed by UAS to the Warfighter, protected government facilities and critical public and private infrastructure.

About Liteye Systems, Inc. (<https://liteye.com>)

Liteye is a US company located on the front range of the breath-taking Rocky Mountains. Liteye Systems, Inc. is a world leader in technology solutions manufacturing & integration of Counter Unmanned Aircraft Systems (CUAS), Drone Sense and Warn Systems, rugged high-resolution head mounted displays (HMD), augmented weapons sights, covert thermal surveillance systems, electronic warfare packages, radar systems, and fire control software. Our cutting-edge solutions feature revolutionary designs in optics, electronics, ergonomics, and form factors that enable a broad range of military and commercial applications. Our R&D team delivers sophisticated custom technology solutions for some of the world's largest companies and government agencies. With offices in the UK and sales affiliates worldwide, Liteye is protecting critical infrastructure from real world threats.
