

Organ Transplant Advocacy

TRANSPLANT ANGELS
WITH YOU, ALL THE WAY

What is Organ Transplant Advocacy?

Transplant Angels represents and assists individuals and their families going through the organ transplant process. We facilitate and care for the patient and their families with;

- Managing records & forms
- Coordinating with doctors & hospitals
- Scheduling appointments
- Logistics & Housing
- & Much more

The immense pressure and critical timing to manage these processes are demanding and time consuming. We do the work, so the patient can focus on their health, and their loved ones.

Organ Transplant Trends

40,000

Estimated number of transplants in the US for 2021

Source: UNOS

106,821

Total waiting list candidates

Source: UNOS

39,036

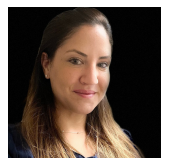

Total number of organs donated in 2020

Source: OPTN Data

These statistics represent a global trend of increased donations, both deceased and living donors. The requirements and needs of both donors and recipients are changing constantly and there is no patient advocacy from the institutions that provide the transplantations. This leaves the patient with the requirement to complete and manage their care completely on their own.

Transplant Angels = Patient Advocacy
