

# YETI CONTROL

## THE EVOLUTION OF MAMMOTH CANNCONTROL

YetiControl (previously Mammoth® CannControl) is a contact and vapor-action insecticide, miticide, and fungicide, and is useful as a component of Integrated Pest Management (IPM) programs. For use on all plants including food crops intended for human consumption. This is the same premium recipe you have counted on over the years for all of your preventative and control needs. Now that CannControl has found its new home, our label is evolving, reflecting the Organitek family, while also addressing a larger audience of growers and a variety of plants.

250 mL - case qty 12	1 gal - case qty 4
500 mL - case qty 12	2.5 gal - case qty 2
